MINI EXCAVATORS

SY16C | SY18C

Engine
Yanmar 3TNV80F
Rated power
14.6 kW / 2400 rpm
Bucket capacity
0.04 m³
Operating mass
1750 / 1850 kg

SANY

For challenging tasks, you need a first-class partner

Quality comes from experience. And from new ideas. This is why we combine these two crucial factors at SANY. This is because we are one of the world's leading producers, having sold more than **170 000** excavators in **10 years**. This means that you can always rely on sophisticated products that have been tried and tested in practice. An impressive **5–7%** of our annual turnover is dedicated to research and development. This is why we give you not only our word, but also our extraordinary **five-year warranty** as a guarantee of how powerful and robust our products are.

SY16C | SY18C

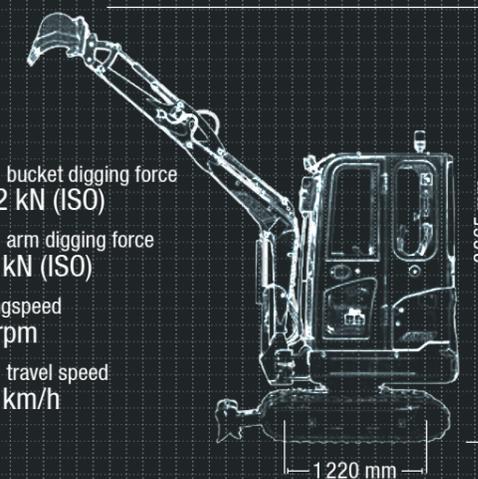

COPEs WELL WITH LITTLE SPACE

Whenever things get tight, the SANY SY18C mini excavator is just right. Measuring just 980 mm in width, it even fits through narrow passages, making it the ideal solution for garden and landscaper construction and for work directly on buildings or in existing buildings. Its outstanding equipment is also impressive – take, for example, the width-adjustable chassis, the versatile proportional hydraulics of the auxiliary control circuit or the bright LED work lights.

Weighing in at just 1 850 kg and with a transport height of only 2 420 mm, it is also very easy to transport, can be loaded and unloaded quickly and impresses on site with its excellent manoeuvrability in confined spaces. At the same time, it does not compromise on efficiency in any way – for example, it stands out with a maximum horizontal reach of up to 4 000 mm. **It is also available as a canopy version in the SANY SY16C version.**

SY18C HARD FACTS

Max. bucket digging force
15.2 kN (ISO)
Max. arm digging force
9.2 kN (ISO)
Swingspeed
10 rpm
Max. travel speed
3.8 km/h

QUALITY

Robust and durable – the most important protective elements and reinforcements as well as all cladding parts are made of high-quality metal, ideal for tough use in the construction industry.

DIMENSIONS

Lightweight and compact – the SY18C fits easily onto standard car trailers and can be transported quickly to any location, even where space is tight.

USER EXPERIENCE

Extremely comfortable – from easy access to the comfortable seat and the ergonomically designed controls, drivers can look forward to maximum comfort.

SAFETY

No compromise – the SY18C is fully equipped for precise, safe working even in very confined application conditions. In addition to the standard rotating warning beacon, this also includes the battery disconnection switch and an emergency stop button.

COMPONENTS

Quality as standard – the SY18C already comes with extensive features as standard. In addition, it features core components such as the engine and pumps from renowned brand manufacturers like Yanmar and Casappa.

ECONOMY

Economically impressive – low procurement cost, economical consumption in compliance with emission standard 5 and straightforward maintenance which is attractive. When it comes to costs, SANY mini excavators really are mini.

AS PRECISE AS BY HAND – ONLY MUCH QUICKER

Mini excavators in particular require high operational flexibility. In this regard, the SY18C is simply unbeatable. It also has a powerful hydraulic system that gives it the necessary power. Together with the precise response behaviour of the hydraulics and chassis, this makes it a perfect precision tool.

QUALITY

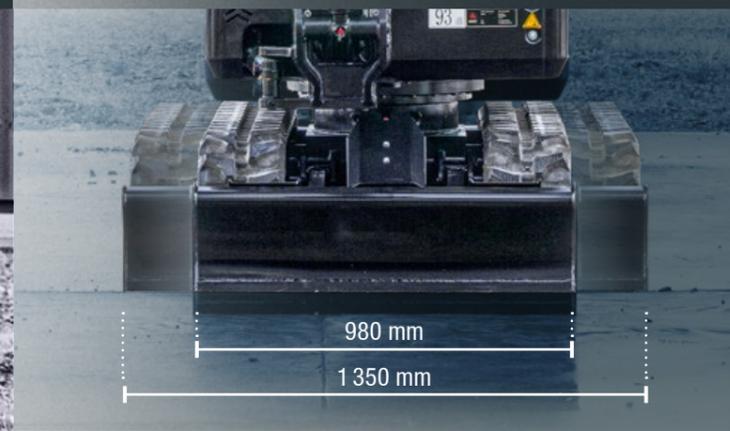

Fully resilient – metal access panels

Durability and robustness are standard features on all SANY mini excavators. For example, the access panels parts are made exclusively of metal. This makes them particularly robust – and if a bump happens during the tough everyday work on a construction site, it can usually be repaired. This is what we mean by sustainability.

DIMENSIONS

Adjustable track frame to suit all your requirements and increase stability

When things get really tight, the SY18C makes itself very small – with a width of just 980 mm, it can even fit through a garden gate, a door opening or onto a trailer for transport. If stability is required, the chassis can be hydraulically adjusted to a width of 1 350 mm. The dozer blade can also be adjusted to the respective width.

The added benefits SANY offers you:

- + Width-adjustable chassis
- + Proportional auxiliary control circuit via joystick operation as standard
- + LED work lighting
- + Cab or canopy
- + Load-sensing hydraulic system
- + Emission standard – Stage V

SAFETY

Protection for people and machines

Thanks to the ROPS or FOPS-tested operator's platform, SANY's smallest model also performs well in terms of safety. To ensure that people and machines, tools and buildings and the environment are optimally protected, the standard equipment includes a battery disconnection switch and an emergency stop button. The rotating warning beacon and the travel alarm helps the operator to pay attention to their work during operation.

COMPONENTS

The individual that already has everything

Many things that are good are already standard with the SY18C. For example, the LED work lights that guarantee optimum views in all conditions. Or the sophisticated load-sensing hydraulic system with precise power adjustment to meet current requirements.

USER EXPERIENCE

Maintenance done the easy way

Only a well maintained machine can do a good job. Therefore, all maintenance-relevant parts of the SY18C are easily accessible from ground level. This saves time and money during regular inspections and all maintenance work and increases availability.

The fuel tank is also easy to reach – but with a tank capacity of 23 litres and low fuel consumption, you do not need to refuel as often anyway.

ECONOMY

Your very personal little economic miracle

For great performance in the smallest of spaces, you need a real powerhouse: Agile and extremely compact, flexible and precise. The SY18C gets to the heart of maximum power – for quick and clean results where only manual work would otherwise be possible. This makes it a highly efficient tool. In addition, the SY18C offers an attractive price-performance ratio at the time of purchase and then in terms of operating costs.

Absolute reliability – for peace of mind!

SANY's five-year warranty* gives you the assurance that you can fully count on your equipment.

* With participating partners

USER EXPERIENCE

EVERYTHING PERFECTLY UNDER CONTROL

Precise handling, quick reactions, fatigue-free operation – the controls of the SY18C are designed for ergonomic handling. Designed for everyday use, all switches are easy to reach. Joysticks transmit movements directly and precisely. The digital display is clear and easy to read and shows the most important data at a glance. Using the small wheel in the joystick, the proportional function of the auxiliary control circuit can be easily controlled with the thumb.

ECONOMY

THE FINE DIFFERENCE: OPEN FOR ALL – SANY SY16C

Same technology, same performance – the SY16C differs from the SY18C only in that it is equipped as a canopy instead of a cab. It therefore weighs slightly less – just 1750 kg. The canopy variant offers a perfect view outside of the work area while meeting current ROPS requirements.

ENGINE

Model	Yanmar 3TNV80F
Typ	Water-cooled four-stroke diesel engine with turbulence chamber fuel injection
Exhaust emissions	Stage V
Rated power	14.6 kW / 2 400 rpm
Max. torque	64.7 Nm / 1 800 rpm
Displacement	1 267 ccm
Batteries	1x 12 V / 55 Ah

HYDRAULIC SYSTEM

Main pump	Variable displacement axial piston pump
Max. oil flow	48 l/min
Travel motor	Variable displacement axial piston engine
Rotation device	Variable displacement axial piston engine

RELIEF VALVE SETTINGS

Implement circuit	245 bar
Swing circuit	162 bar
Travel circuit	245 bar
Pilot pressure	35 bar

SERVICE REFILL CAPACITIES

Fuel tank	23 l
Engine coolant	3.8 l
Engine oil	2 l
Drive (per side)	0.4 l
Hydraulics system	26 l
Hydraulic oil tank	21 l

PERFORMANCE

Swingspeed	10 rpm
Max. travel speed	High 3.8 km/h, slow 2.2 km/h
Max. travel force	15.6 kN
Bucket capacity	0.04 m ³
Ground pressure	29.1 kg/cm ² / 30.8 kg/cm ²
Gradeability	30°
Bucket digging force ISO	15.2 kN
Arm digging force ISO	9.2 kN

OPERATING MASS

SY16C	1 750 kg
SY18C	1 850 kg

UNDER AND UPPER STRUCTURE

Boom length	1 810 mm
Arm length	1 130 mm
Bottom rollers	3
Rotation device	Axial piston engine with planetary gear running in the oil bath and single-row slewing ring. Spring-loaded slewing gear parking brake, hydraulically released.
Undercarriage	Reinforced lower structure with larger dimensions. Welded drive frame in box design made of special material. Side frame welded to the drive frame.

LIFTING CAPACITIES OF LOWER DOZER BLADE

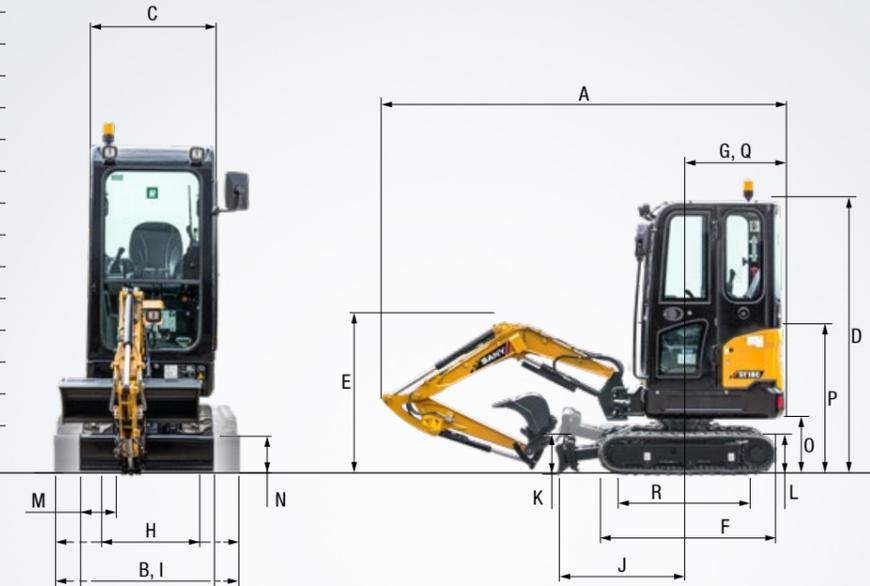

Load point height	Radius				Digging reach	
	1.5 m / 4.9 ft	2.0 m / 6.6 ft	2.5 m / 8.2 ft	3.0 m / 9.8 ft	Maximal	Maximal
3.0 m kg					285	285
9.8 ft lb					627	627
2.0 m kg			267	253	271	271
6.6 ft lb			587	557	596	596
1.0 m kg		483	486	371	370	306
3.3 ft lb		1063	1063	816	814	673
Ground line	kg	826	826	631	528	456
	lb	1817	1817	1388	1162	1003

					243	252
					535	554
					316	318
					695	700

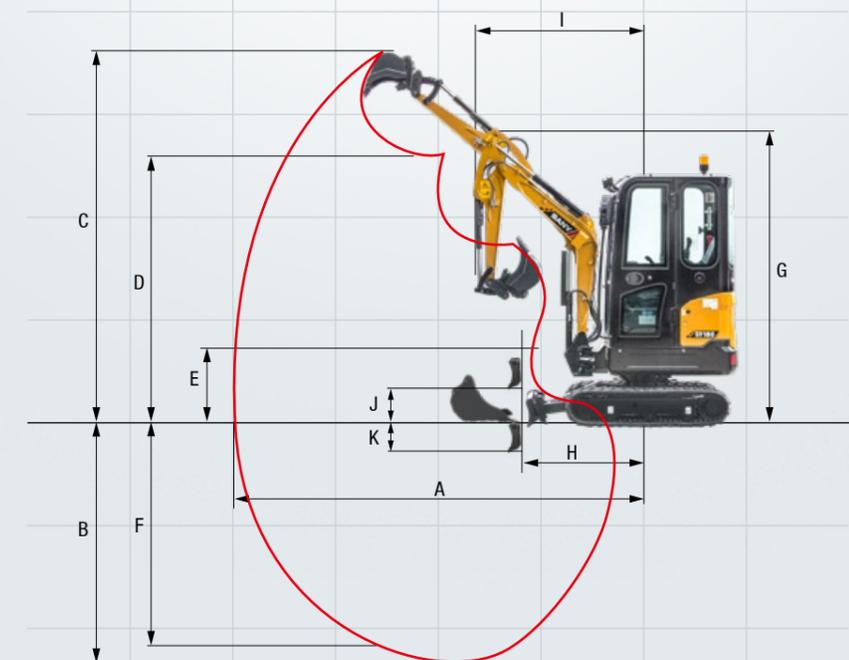

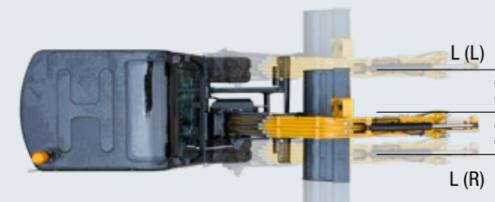

DIMENSIONS (TRANSPORT)

A	Transport length	3 575 mm
B	Transport width	980/1 350 mm
C	Upperstructure carriage	980 mm
D	Height over cabin/ROPS	2 420 mm
E	Height of Boom – transport	1 175 mm
F	Overall length of crawler	1 585 mm
G	Tail length	900 mm
H	Track gauge	750/1 120 mm
I	Undercarriage width (blade)	980/1 350 mm
J	Horizontal distance to blade	1 140 mm
K	Blade height	280 mm
L	Track height	375 mm
M	Track pads width	230 mm
N	Min. ground clearance	180 mm
O	Counterweight clearance	470 mm
P	Engine cover height	1 275 mm
Q	Tail swing radius	920 mm
R	Center distance of tumbler	1 220 mm

WORKING AREA

A	Max. digging reach	4 000 mm
B	Max. digging depth	2 360 mm
C	Max. digging height	3 665 mm
D	Max. dumping height	2 635 mm
E	Min. dumping height	795 mm
F	Max. vertical digging depth	2 215 mm
G	Overall height over arm by min. swing radius	2 745 mm
H	Arm head distance with work equipment retracted as far as possible	1 655 mm
I	Swing radius by max. boomswing (L)	1 420 mm
	Swing radius by max. boomswing (R)	1 435 mm
	Min. swing radius	1 705 mm
J	Max. clearance when blade up	310 mm
K	Max. depth of blade down	320 mm
L	Offset boom (L)	595 mm
	Offset boom (R)	350 mm
	Max. boom-swing angle (L)	73°
	Max. boom-swing angle (R)	46°

EFFICIENT PERFORMANCE IN MINI FORMAT

Their extremely simple handling and flexible, precise operation make the mini-excavators a highly productive tool for every job. As lightweight machines with compact dimensions, they can also be transported quickly and easily to the place of use.

ROBUST AND DURABLE

The most important protective elements and reinforcements as well as all cladding parts are made of **robust metal**. **Robotic welded components** guarantee a long service life under all conditions.

EXTREMELY COMFORTABLE

Impressively simple thanks to the **joystick, which is easy to operate with high precision**, and the **clear display**.

NO COMPROMISE

In order to provide **the best possible protection for both people and machines**, devices such as cylinder guard plates are already integrated. It goes without saying that the platform is **ROPS or FOPS certified**.

TECHNICAL HIGHLIGHTS

Engine	Yanmar 3TNV80F
Rated power	14,6 kW / 2 400 rpm
Max. torque	64,7 Nm / 1 800 rpm
Max. travel speed	3,8 km/h
Swingspeed	10 rpm
Mainpump	Variable displacement axial piston pump
Max. oilflow	48 l/min

LIGHTWEIGHT AND COMPACT

Chassis adjustable in width – from extremely narrow when manoeuvring to wide for the best possible stability.

ECONOMIC

The intelligent control system adapts the pump capacity to the respective demand for **greater efficiency and reduced fuel consumption**.

QUALITY AS STANDARD

High-quality components from brand manufacturers guarantee top performance and a high level of operational safety – also for the **extensive standard equipment**. For example, these include the auxiliary control circuit, LED lighting and even the radio on cab machines.

**"EXCELLENT POWER AND CONTROLLABILITY
COMBINED WITH A VALUE ADDED PRICE!"**
