Notes

¹ A number of engines were built with the letter 'R' as the year of manufacture code. In the middle of January 2008, the year of manufacture code was changed to the letter 'S'. If your full engine serial number ends with the letter 'R', Perkins Engines Company Limited will recognise the full engine serial number.

² Represents current manufacturing facilities.

If the letter 'R' appears after the country code this represents a remanufactured engine (ie UR = UK remanufactured engine).

Notes

¹ PK Series engines are derived from the 1106D Series platform but are only Stage II EU 2007 genset emissions compliant.

² Available from 2013.

Peterborough products may show a finishing list on the engine plate, eg F1895. It is very important to quote this when spare parts are required.

1300 Series

From January 2010 ElectropaK (EP) and June 2010 Industrial Open Power Unit (IOPU) the engine numbering format for 1300 Series engine range changed to bring it into line with 2000 and 4000 Series engines.

2000 Series Electronic (Stafford)

From the 1st January 2008 the engine numbering format for the 2000 Series engine range changed. The two numbers used previously to determine the number of cylinders per engine, have been replaced by one letter. The following letters will define the number of cylinders:

- 6 Cylinder engine
 - 8 Cylinder engine

F will replace 06
H will replace 08
- 12 Cylinder engine
 - 16 Cylinder engine

M will replace 12
R will replace 16
